

HSC Lidder

Helping you put a lid on it!

The HSC Lidder automates the task of inserting an HSC bottom or bliss box into an HSC lid, reducing labor required. The lidder also provides the flexibility to handle minor variations in specification, reducing packaging waste.

- Perfect for apples, citrus, pears or potatoes
- Interfaces with case or tray erectors
- Runs up to 20 trays per minute
- Creates flexibility as multiple lidders can be fed by one case erector or tray former
- Designed with high safety and ergonomic standards

General Case Limits

	Min - in	Max - in
Case length	16	24
Case width	12	16
Case height - HSC	12	22
Case height - Bliss	6	12
