

## Bow Tie Shipper

### What Is It?

This patented design is intended to replace small, glued RSC's that don't fit the minimums of larger FFG's and two-pass boxes that are being die-cut and then glued.

It allows for new, smaller sized solutions and provides an alternative design for mini flexo boxes. This design can be easily configured for multiple sizes and is an ideal solution for many hand assembly applications in the eCommerce and pick and pack distribution segment.

### Advantages:

- No glue joints
- More per pallet
- No skewing
- RSC flaps used to close
- Similar compression
- Hand assembly operation
- Unique unboxing
- 1-2-3 bottom alternative
