

MaxNest™ Top Seal Punnets

Sustainable plastic clamshell replacement

Committed to deliver the benefits that matter most.

Our innovative, patented MaxNest top seal punnets provide a sustainable solution while minimizing freight costs.

Features

As more and more consumers and legislation demand the reduction and elimination of single-use plastics, our patented fiber-based MaxNest top seal punnets provide your company with a sustainable solution.

Our innovative design creates optimized nesting of the trays compared to traditional trays. This design allows more trays per truck, ultimately saving your company freight.

Our MaxNest top seal trays can be tailored to your specific needs, with customized graphics and optimized sizes that seamlessly integrate with existing top seal equipment. Look to us to make your transition from plastic to a more sustainable fiber-based top seal tray a worry-free process.

Benefits

Recyclable - meets the Fibre Box Association's certification standard for recyclability and repulpability

Performance - provides product protection and visibility for retail display

Cost effective - maximum nesting allows for freight savings compared to traditional punnets
